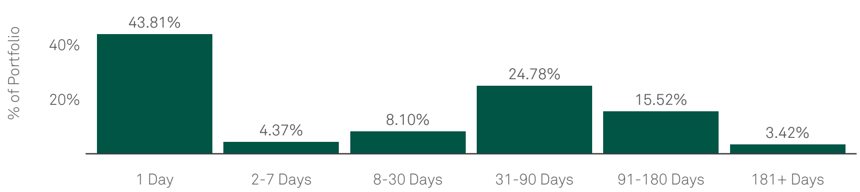
**The performance data quoted represents past performance, which is no guarantee of future results. The performance shown is net of fund expenses and includes the absorption of certain fund expenses by the Investment Adviser. Current performance may be lower or higher than the performance quoted. Yield fluctuates.**

**Maturity Distribution[5]**



[1]As a measure of current income, 7-day yield more closely reflects the fund's current income-generating ability than the total return.
[2]30-day yield is based upon dividends per share from net investment income during the past 30 days, divided by the fund's maximum offering price per share at the end of the month and annualized.
[3]Portfolio composition is subject to change at any time.
[4]Any order in proper form placed by the fund's trading deadline and for which federal funds are received by 12:00 p.m. ET will be effective on that date. Investors will earn the dividend declared on that day.
[5]Maturity distribution reflects the final maturity date except for floating rate securities for which the next reset date is reflected.
[6]WAM is a measure of the average effective maturity of all of the underlying money market instruments in the fund, weighted to reflect the relative percentage ownership of each instrument. WAM calculations allow for the maturities of certain securities with periodic interest rate resets to be shortened. Generally, for money market funds, WAM can be used primarily as a measure of relative sensitivity to interest rate changes.
[7]WAL is a measure of the average final maturity of all of the underlying money market instruments in the fund, weighted to reflect the relative percentage ownership of each instrument. Unlike WAM, WAL calculations do not allow maturities to be shortened for periodic interest rate resets. Accordingly, WAL will generally be higher than WAM.
[8]A 'AAAm' rating by S&P Global Ratings is obtained after S&P evaluates a number of factors, including portfolio credit quality, diversification, maturity, and liquidity of the fund as well as the strengths and weaknesses of the fund's management including credit research, risk management and internal controls to limit exposure to loss. 'AAAm' is the highest principal stability fund rating assigned by S&P Global Ratings. Ratings are subject to change and do not remove market risk. S&P Global Ratings is neither associated nor affiliated with the fund. Fund ratings are statements of opinion, not statements of fact or recommendations to buy, sell or hold the shares of a fund. Standard & Poor's (S&P) believes that, with a Principal Stability Rating of AAAm, the fund has an extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. For more information on the rating methodology visit www.standardandpoors.com.

# NY MuniTrust®
# Excelsior Fund

## Fund Goal

In all its investments, the Excelsior Fund seeks to maximize liquidity, convenience, and competitive rates of return. The portfolio strategy is to be fully invested each night to maximize yield potential.

## Pool Services Provider - BNY

BNY, headquartered in New York, has been a premier global investments organization for 240 years. We bring all of our services together for a singular purpose: to power individuals and institutions to succeed across the financial world. We imagine what's possible, create it, then build on it to unlock for the entire industry.

## Pool Investment Adviser - Dreyfus

Dreyfus is a division of Mellon Investments Corporation, a registered Investment Adviser and subsidiary of BNY. Dreyfus is one of the largest and trusted liquidity managers in the industry. Our strategies span major asset classes, including Treasury, US government and short duration fixed income. Investors can access our solutions in a variety of pooled vehicles, including domestic and offshore money market funds, an ultra-short income exchange-traded fund (ETF), and collective investment trusts (CITs). We also offer customized portfolio solutions, including separately managed accounts as well as private and white label options. With 50 years of history, we are committed to building intelligent, innovative liquidity solutions with our clients in mind.

## Investment Approach

To pursue this goal, the fund invests in high-quality, short-term, US-dollar-denominated debt securities including US Treasury securities, US government agencies, repurchase agreements collateralized solely by US government securities and/or cash, collateralized bank deposits and/or general obligations bonds, and notes. Additionally, the fund may use the recently expanded New York State General Municipal Law (GML) investment guidelines, including the ability to invest in highly rated commercial paper and government money market mutual funds. This professionally managed fund allows counties the opportunity to seek to maximize liquidity, convenience, and competitive rates of return. The portfolio strategy seeks to be fully invested each night to maximize yield potential.

## About NY MuniTrust®

NY MuniTrust® was developed to support public entities' liquidity needs in the state of New York. NY MuniTrust supports two separate funds: (1) NY MuniTrust Excelsior Fund for counties and (2) NY MuniTrust Empire Fund for other public entities. The fund's short-term fixed income investments are permissible under the New York State General Municipal Law (GML) and provide the ability to invest operating cash in a diversified portfolio of short duration fixed-income securities.

**Investors should consider the investment objectives, risks, charges, and expenses of the Funds carefully prior to investing. Investment in the Funds is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency, and although the Funds seek to preserve the value of the investment at a fixed share price, it is possible to lose money by investing in the Funds.**

This material is a general summary of some of the basic features of the NY MuniTrust® Local Government Investment Pool ("LGIP" or "Pool"), is for informational purposes only, and should not be construed as investment advice or a recommendation of any security. For a more complete understanding of Pool-specific features, please refer to the NY MuniTrust Information Statement available from the LGIP or its distribution agents.

The Pool is an intermunicipal agreement (IMA) created through a municipal cooperation agreement (Municipal Cooperation Agreement) made pursuant to New York General Municipal Law, Articles 3-A and 5-G (collectively, the Act), dated as of February 1, 2022 by and among Orange County (Lead Participant) and each district and municipal corporation, as defined in the Act, that enters into the Municipal Cooperation Agreement hereof (collectively, together with the County of Orange, the Participants).

Risks Considerations: Investments in the Funds involve investment risks, including the possible loss of principal. Market risk is the potential for a decline in the market value of a debt instrument and may be affected by a change in interest rates, political, regulatory, economic and social developments. Interest rate risk refers to the decline in the prices of fixed income securities that may accompany a rise in the overall level of interest rates. A sharp and unexpected rise in interest rates could impair the Fund's ability to maintain a stable net asset value. Very low or negative interest rates may magnify interest rate risk. In addition, a low interest rate environment may prevent the Fund from providing a positive yield or paying Fund expenses out of Fund assets and could impair the Fund's ability to maintain a stable net asset value. Credit risk is the possibility that the issuer of a bond or other security will fail to make timely payments of interest and principal. The credit risk associated with each Fund within the Pool, therefore, depends on the credit quality of the underlying debt instruments held by that Fund. In the event of a payment default on a debt instrument held in a Fund, the investment return on the Fund within the Pool that owns the investment in default will be adversely affected and, in some cases, the Fund could experience a loss of principal. Liquidity risk is the potential for there not to be a ready market for the securities in which the Fund invests. Lack of ready markets could prevent the Fund from selling securities to provide cash to meet liquidity needs, including amounts required for timely payment of withdrawals requested by participants.

BNY and NY MuniTrust® are unaffiliated companies. BNY Mellon Securities Corporation (BNYSC), a registered broker-dealer, is a distributor for NY MuniTrust. BNY Mellon Investment Servicing (US) Inc. is the transfer agent, The Bank of New York Mellon is custodian and Dreyfus, a division of Mellon Investments Corporation (MIC), a registered investment adviser, is the investment advisor. All are subsidiaries of The Bank of New York Mellon Corporation. BNY is the corporate brand of The Bank of New York Mellon Corporation and may be used to reference the corporation as a whole and/or its various subsidiaries generally.
